Your report will be published in the college magazine.

4. Summarize the following passage in not more than 100 words and give it a suitable title. 8+2=10

Modern life is becoming more and more chaotic and disjointed day by day. Everywhere there is disharmony. In the struggle for survival in this competitive world human beings have forgotten how to live in harmony. That is what Feng Shui teaches us to do-to create harmony in our lives. The Chinese form of Geomancy or

Feng Shui, has evolved to be both a science and an art. It's an art since it allows one to explore oneself and one's environment. And it's a science as there is a logic and reason behind everything.

It is not as complicated as many believe it to be. The markets are flooded with Feng Shui objects-beautiful wind chimes, laughing Buddha, dragons, crystal globes and turtles, to heighten positive energy. The purpose of Feng Shui is to organise our homes in such a manner that the Chi energy is accentuated by the precise positioning of our house. It believes that everything and everyone is made of five elements-wood, fire, metal, water and earth. They can have positive or negative impact depending on their harmony. Wood is beginning of new life. Fire is the yang element and earth is the most inert element. Metal is the most common solution. Water gives life. Feng Shui is based on the principle of Yin and Yang. These two constantly interact to give harmony in our lives. There are a number of instances which have shown that by following the principles of Feng Shui people have benefitted a lot in terms of prosperity and fame.
